VOIP (Telephone via Network)	<input type="radio"/>	<input type="radio"/>	

<sup>1</sup> Requires installation of appropriate codecs for Microsoft Windows / <sup>x</sup> for Brightsign: as supported by Brightsign-hardware.

<sup>2</sup> Sub-layers are necessary e.g. in order to allocate user-rights to certain partitions of the screen.

<sup>3</sup> The feature easescreen eSign gets licensed together with the eSign Server and allows for web-based room-booking.

<sup>4</sup> The easescreen event "analog/digital TV" and the integration of sensors require hardware certified by easescreen.

<sup>5</sup> Must be supported by the used output device [RS232] and the output device must be implemented in easescreen.

<sup>6</sup> Compatible with any scheduling software that exports data on a HTML or XML basis.

standard feature  
 optionally available for additional charge
